

SHRUTI DESAI

Computer Science Undergraduate | Aspiring Software Development Engineer

Computer Science undergraduate with strong foundations in DSA, OOP, DBMS, and backend development. Experienced in building REST APIs and scalable backend systems using Java, Python, and AWS. Passionate about backend engineering, cloud technologies, AI-driven systems, and solving real-world problems through efficient software solutions.

EDUCATION

MKSSSs Cummins College of Engineering for Women, Pune

B.Tech – Computer Science Engineering (2023–2027)

Current CGPA : 8.2/10

Sanjay Ghodawat Junior College Atigre

HSC board : 72%

Castle View Academy, Gargoti

SSC board : 99.20%

SKILLS HIGHLIGHTS

- Programming Languages: Java, Python
- Backend Development: REST APIs, JDBC, Node.js, Fast APIs
- Cloud & Web Technologies: AWS, Node.js, HTML, CSS, React.js
- Databases: MySQL (Query Optimization, Joins, Indexing)
- Tools & Technologies: Git, GitHub, Postman, VS Code
- Core Computer Science: Data Structures & Algorithms, OOP, DBMS, Operating Systems
- Additional Skills: Problem Solving, Debugging, Structured Programming

OPEN SOURCE CONTRIBUTIONS

- **GirlScript Summer of Code (2025)** – Campus Ambassador
- **GirlScript Summer of Code Extended (2024)** – Contributor
- **Hacktoberfest (2024)** – Participant & Contributor
- **Contributed to 3+ open-source repositories across Python and web development projects**, improving features, fixing bugs, and writing documentation.

PROJECTS

TaskFlow – Serverless Task Management Application on AWS

Tech Stack: AWS Lambda, API Gateway, DynamoDB, Amazon SNS, EventBridge, Amazon S3, IAM, Python, HTML/CSS, JavaScript

- Built a serverless task management system using AWS Lambda, API Gateway, and DynamoDB
- Integrated SNS for notifications and EventBridge for automated task reminders
- Deployed frontend on S3 with IAM-based secure access management

Document Processing & Analytics API

Tech Stack: Python, FastAPI, Pandas, Uvicorn, REST APIs

- Developed FastAPI backend for document upload, processing, and analytics via REST APIs
- Implemented Pandas-based text analysis pipelines with asynchronous processing
- Designed structured JSON APIs for file handling and insights retrieval

Nursery Management System with Online Plant Ordering

<https://github.com/ShrutiDesai7/LocalLeaf>

Tech Stack: React.js, Node.js, Express.js, MySQL, JWT, REST APIs

- Built REST APIs for plant management and order processing with JWT authentication
- Optimized MySQL queries using indexing, improving response time by ~20%
- Developed real-time order tracking system for improved user experience

AI-Driven Workforce Attrition Predictor using HR Analytics

Tech: Python, Scikit-learn, Gradio, Pandas, Matplotlib

- Built an ML-powered tool to predict employee attrition using IBM HR analytics dataset
- Applied preprocessing (label encoding, scaling) and deployed real-time prediction with Pickle
- Created interactive UI using Gradio with login, visualization, and probability-based insights
